Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
September 14, 1985

Highlights

U.S. coal production in the week ended September 14, 1985, as estimated by the Energy Information Administration, totaled 18.48 million tons (bituminous coal and lignite, 18.41 million tons; Pennsylvania anthracite .07 million tons). This was 17.0 percent higher than the previous week, and was 5.9 percent lower than production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through September 14, 1985 was estimated at 622.73 million tons, 4.9 percent below the 654.68 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
